

# CrisisManager™

Empower your employees with immediate access to critical safety information.

CrisisManager is a robust mobile solution designed to put critical safety procedures, safety data sheets (SDS) and other similar documents right in the hands of your workers without the bulk, expense and inefficiencies associated with paper-based alternatives. Maintaining compliance and being prepared is important. CrisisManager gives the user the speed and accessibility they need to do just that, saving your organization time and money, and giving you peace of mind.

## BENEFITS

- **Immediate Information & Communication** – Create a centralized repository of safety procedures and protocols, and make them accessible to workers anytime, anywhere. Send unlimited push notifications and emails to reach your employees all at once and provide an action plan.
- **Detail & Accountability** – Update plans and push notifications and emails whenever you need to. Create incident reporting forms with GPS and pictures that you can later gather data from.
- **Customized to You** – A platform for you to upload the set of plans, diagrams and maps that your organization needs. It can be customized to look like your brand using your colors, graphics and layout.
- **High Tech** – Works without an internet connection and is supported on Apple™, Android™ and Kindle™ devices.
- **Affordable** – Start at an investment that makes sense for your organization and build on to your solutions as the need to create new plans arises.

## KEY FEATURES

### Administration

- Setup is easy and publishing is simple
- Administrators can publish custom plans
- Update and push new content as often as needed
- No special technical skills or additional technical staff required

### Alert

- Send push notifications and emails to users to alert and inform
- Incident reporting for users, including photos and GPS location

### Access

- Fully secure and customizable
- Unlimited users and downloads
- Publish content and password protect it based on role
- Security and data compliant
- Users install CrisisManager like they would any other app
- Ability to access emergency & safety plans, even when telecommunications and/or internet are inaccessible in crisis events
