

Value of Investment

Value of SchoolDude's Energy Management Solutions

SchoolDude's energy management solutions simplify energy tracking and energy conservation programs. They allow schools to establish benchmarks for energy consumption and costs, develop plans to reduce energy use, track conservation program success, and receive recognitions for their successes.

Value of Investment

- Tracks utility bills for increased visibility into energy spend
- Reduces energy costs with a conservation program
- Automates use of ENERGY STAR for EPA recognition

Track Utility Bills

You can manage your utility data in the most cost effective way, establish energy use benchmarks, compare consumption over time and across buildings, and identify billing errors or other mistakes - all possible with UtilityEssentials. Schools that monitor their utility bills save at least **\$25 per student**.

Reduce Energy Costs

Energy management solutions reduce energy consumption and costs by providing the data necessary to make actionable energy conservation plans that address behavioral changes and building improvements. UtilityEssentials identifies buildings with opportunities for improvement such as equipment replacement. Share these results to increase awareness and recognition. **Energy conservation programs can reduce energy costs by 10%.**

Automate ENERGY STAR ratings

By integrating ENERGY STAR with energy management software, you can automate the process of monitoring ENERGY STAR ratings. ConserveDirect saves staff time by eliminating duplicate data entry into Portfolio Manager. Top performing ENERGY STAR schools cost \$.50 per square foot less to operate and **save up to 35% on energy and greenhouse gas emissions.**

SchoolDude's energy solutions simplify the process to develop a successful energy program. UtilityEssentials automates utility tracking, the first step to a successful energy program, and automates the use of ENERGY STAR to receive high ratings, recognition and awards.

SchoolDude Solutions

UtilityEssentials

- Track and monitor all utility bills
- Compare consumption and energy spend
- Reduce cost of utilities in facilities
- Reduce energy costs by monitoring ENERGY STAR ratings
- Eliminate duplicate data entry in Portfolio Manager
- Improve communication and earn recognition

UTILITY TRACKING & ENERGY CONSERVATION	ANNUAL SAVINGS PER STUDENT
Average utility costs*	\$250
Savings on energy bills (10%)	\$25
Sample savings:**	\$125,000

* Based on AS&U's 38th Annual Maintenance & Operations Cost Study for Schools

** Example for a 5,000-student organization. To calculate your school's potential annual energy savings, take your number of students and multiply that by \$25.
