

Value of Investment

Value of SchoolDude's Facility Scheduling Solutions

SchoolDude's facility scheduling solutions simplify all aspects of event management including facility scheduling and facility automation to override your Building Automation System (BAS), providing heating and cooling to your facility space outside of normal classroom hours. These solutions enable you to schedule your facility internally and at the request of the community, track usage for cost recovery and improve your approval process.

Value of Investment

- Reduces staff time required to manage facility usage
- Increases cost recovery by tracking actual usage costs

Reduction in Staff Time for Events

Although each organization has a slightly different process for scheduling an event, all event scheduling requires many different people to be involved in the process. Automating the scheduling and management process for facility use saves time and helps *identify the cost of supporting events*. The average event scheduling cycle can *save 1 hour with scheduling automation*.

Increased Cost Recovery

The rising use of school facilities creates a burden on the support service teams (custodial, maintenance, energy, IT) and strains already tight operating budgets. Automating the event scheduling process ensures you have the documentation necessary to recover costs. Institutions performing in the top 10% *recover approximately \$27 per student annually*.

Opening your facility for public use can improve relationships with local organizations and generate funds to recoup operating costs. SchoolDude's facility scheduling solutions, Event Essentials Pro and FSAutomation, can streamline the scheduling process, save your staff time, and track actual usage costs.

SchoolDude Solutions

EventEssentials Pro

- Automate routing and approval of events
- Eliminate scheduling conflicts
- Track event costs

FSAutomation

- Schedule equipment operation and reduce energy costs by 3%
- Save your staff 15 minutes per event by automating BAS overrides
- Optimize after-hour schedules based on actual usage

EFFICIENCY GAINS	ANNUALLY
Estimated events per year	3,780
Time savings of 1-hour per event	3,780 hours
Total Savings (at \$25/hour rate):	\$94,500

(Based on national averages)

SAVE
1 HOUR
/Event

COMMUNITY USE	ANNUAL COST RECOVERY
Estimated events per year	3,780
Cost recovery income per student	\$27
Cost Recovery Income:	\$102,060

Example for 3,000 student organization, assuming 1.26 events per student annually. (Based on national averages)

Efficiency Gains:
\$94,500

Average Cost
Recovery:
\$102,060
