

Value of Investment

Value of SchoolDude's Technology Management Solutions

SchoolDude's IT management solutions streamline educational institutions' IT services to run more efficiently. IT help desk software provides time savings and cost savings for IT support, while IT asset management software automates the management, monitoring and auditing of hardware and software assets.

Value of Investment

- Saves staff time on IT tickets
- Increases visibility and reduces time of audits for IT hardware and software
- Tracks assets to reduce lost and stolen equipment

Save Staff Time on IT Tickets

By automating the support request process, you save time and increase the productivity of your technicians. An automated, online solution increases customer satisfaction through faster response time to incidents, **up to 30 minutes per request.**

Increase Visibility of Hardware and Software

Standardize monitoring of all asset types with IT asset management solutions. With increased visibility into license use, you can un-install unused software licenses and determine immediately if unauthorized downloads take place. Eliminate physical walkthroughs and decrease time of audits by **17 minutes per computer.**

Reduce Stolen and Lost Equipment

Asset monitoring solutions increase asset security by quickly identifying missing equipment and acting as a deterrent to theft, **saving schools up to \$80,000 per year.**

Utilizing online technology for IT help desk management and asset management can save time and money in your technology department. SchoolDude's technology management solutions, TechnologyEssentials, help you manage resources more efficiently, improve customer satisfaction, and secure the safety of IT hardware and software at your institution.

EFFICIENCY GAINS	ANNUAL SAVINGS
